

Installation Instructions

CASUARINA DIVE PLANNER™

Please *keep a record of the serial number* included with your CD-ROM or your downloaded software. It is the “**password**” you will need to install Casuarina Dive Planner (CDP) and to register and permanently activate your software.

To install CDP, you must –

1. Insert the installation CD in your CD-ROM drive.
2. If the SETUP program does not automatically initiate, click on d:\SETUP.EXE in Windows Explorer or enter “d:\SETUP.EXE” in your START/RUN in your task bar (where d: is the drive letter for your CD-ROM drive).
3. When SETUP.EXE prompts for your “installation password” enter the **serial number** of your copy.
4. When SETUP.EXE completes your installation, it will display an **installation code**. Record this code and submit it to Casuarina Aquatics, Inc., (CAI) to register your software and to receive a permanent **activation key** from CAI. (Registration can be done via e-mail, postal mail or the CAI web site – <http://www.casuarina-aquatics.com>. See the web site for the information required for registration.) Without the **activation key**, CDP will run only for a 10-day demonstration period.

To transfer CDP from one computer to another, you must –

1. Uninstall CDP from the first computer using the CDPUNINSTALL.EXE, which is in the directory you selected for CDP. (Do NOT use the Windows ADD/REMOVE SOFTWARE option in CONTROL PANEL.)
2. When CDPUNINSTALL.EXE completes, it will give you an **uninstallation code**. Record this code.
3. Install CDP on the second computer according to steps 1 through 4 above, and record the new **installation code**.
4. Submit your **serial number**, **uninstall code** and new **install code** to CAI to re-register your software and to receive a new **activation key** from CAI for the second computer.

CDP installation includes a User’s Manual in PDF format. You can view and print it using Adobe Acrobat Reader. (A color printer is preferable.) If you do not have Reader, you can download it at no cost from Adobe at <http://www.adobe.com>. *Please read the Manual carefully, including the license terms and warnings!*

Installing CDP also installs the latest version of COMDLG32.OCX, which is a required Windows System file not present on many computers. Although we have had no difficulty installing this file on systems already having the same file, if you have an existing version of COMDLG32.OCX in your c:\Windows\System directory, you may want to copy it to another directory to anticipate the very unlikely possibility that the installed file may cause operating-system difficulties. If problems do occur, then you can overwrite the installed file with your original file.

Multiple-user or multiple-computer licenses are available. Contact sales@casuarina-aquatics.com if such a license is of interest to you.

If you have any difficulty installing or reinstalling CDP, contact support@casuarina-aquatics.com.
